

APOLLO INDEX PORTFOLIO - BALANCED

FEBRUARY 2026

PORTFOLIO AIMS

The Portfolio aims, over the longer term, to provide the potential for a level of return in excess of inflation, and commensurate with a balanced investment strategy that targets participation in rising investment markets whilst also seeking to dampen fluctuations in capital values. To achieve this level of return, the portfolio will invest in asset classes which will introduce fluctuations in capital value over the short and medium term.

PORTFOLIO CONSTRUCTION

The portfolio will invest entirely in index based or passive funds.

Due to its passive mandate, the portfolio's exposure will typically be limited to equities, fixed interest and cash. The portfolio will have a 'neutral' asset allocation in equities of 50%, although the actual level will vary around this depending on global economic conditions and stock market opportunities
